16	Reasons for recommending the equipment as BER	The Supreme Plus Suction Apparatus, installed by Supreme Enterprises in June 2018, has deteriorated significantly, with rusted and weakened body structure, posing a hazard to patients and users. The extensive rusting and physical debilitation compromise the apparatus's integrity, while the motor dysfunction and damaged suction bottle jars exacerbate its unsuitability for medical use. The amalgamated toll exacted by these imperfections highlights an irrevocable estrangement from utility, posing potential harm to patients and operational efficiency. Therefore, we recommend immediate condemnation and to mitigate risks and uphold patient safety.

Subject: Correction of Ticket Number in RBER Performa

Dear Sir/Madam,

I am writing to bring to your attention an error in the RBER Performa concerning a recent complaint. The correct ticket ID for the complaint is 96356, which was opened on 16/02/2024 at GH Thalassery (Barcode number -1311868). However, our engineer mistakenly recorded the ticket ID as 96365 instead of the correct 96356.

I kindly request that you consider ticket ID 96356 as the actual ticket ID in the RBER Performa and make the necessary corrections.

We apologize for any inconvenience this may have caused and appreciate your understanding and cooperation in resolving this matter.

Thank you for your attention to this issue.

Best regards,

Blessen Jose
